

TERMOSTAT KONTAKTNI ELEKTROMEHANIČKI, PLASTIČNO KUĆIŠTE

podesiva temperatura 20/+90°C, tekuća ekspanzija

ELECTROMECHANICAL CONTACT THERMOSTAT IN PLASTIC CASE

adjustable temperature 20/90 °C, operation with liquid expansion

TUSC

> POSEBNA OBILJEŽJA

Podesivi termostat TUSC uglavnom se koristi na cjevovodima sustava grijanja za regulaciju grijaca zraka, plamenika, pumpi i slično.

Radi na principu tekuće ekspanzije koja osigurava konstantnost i preciznost.

Postavlja se, pomoću opruge, tako da osjetni dio mehanizma prisloni na cjevovod.

Pogodni su za:

- standarne i centralne sisteme grijanja
- sisteme podnog grijanja
- razne sisteme koji zahtijevaju ON/OFF signal sa cjevovoda kada temperatura dosegne temperaturu između 20 i 90°C

> DISTINCTIVE FEATURES

The adjustable thermostat TUSC is mainly used on the pipelines of heating systems for the regulation of air heaters, burners, pumps and the like.

The operating principle works with liquid expansion and this ensures consistency and accuracy of operation. The setting takes place via the supplied spring that ensures the contact of the sensitive part to the pipeline and therefore reliability of the response of the thermostat.

Suitable to:

- traditional heating systems and centralized
- floor heating systems
- many other applications when you need to receive an ON/OFF signal from the pipeline when it reaches a temperature of between 20 and 90 °C
